

WARRANTY

The product's warranty period is of 12 months from the purchase date.

This document certifies that the below mentioned products are in accordance with the technical specifications stipulated in the order and benefit from warranty and service if the handling, storage, transport, installation, working and maintenance conditions stipulated in the product's instructions are fulfilled.

The producer grants that the product has no deficiency of material or workmanship. During the warranty period, only the producer has the right to repair or replace the components that prove to be defective.

The warranty covers only those deficiencies which appear during the normal functioning of the product and does not cover the failure arising from: improper handling, storage or mechanical operation, high degree of impurities, assembling in misrepresented positions from those stipulated in the user manual instructions, unrelated objects found inside the product, inappropriate working liquids, incorrect linking up with mechanical couplings or hydraulic joints, working rated data limit exceeded of the product or nonconforming with the producer's instructions, user's interventions on the product unauthorized by the producer.

All the above described defects, described above, are to be repaired on the customer's charge.

When the warranty is requested, the product must be presented to NOVA GRUP SRL with the warranty certificate, and a detailed description of the failure in question.

QUALITY and CONFORMITY CERTIFICATE Typ 3.1 – SR EN 10204 : 2005

The present Certificate is the legal document which is proof of the fulfilling of the quality conditions by delivered product, corresponding to the target for which was produced, in conformity with technical documentation and laws in force, and SC NOVA GRUP SRL assumes his responsibility for this matter.

Product code	Serial No.	Pcs.

We declare on our own responsibility, in conformity with Article 5 from Government Decree Nr.1022/2002, that the product above mentioned on which present declaration is referred to, is not harmful for life, health, industrial security and do not generate a negative impact against environment, if the product is used in conformity with their technical and security files.

Quality Inspector,
